## MEMORADUM

To: Interested Representative

FROM: Pedro Garcia, Food Service Coordinator

DATE: January 22, 2009

SUBJECT: Sewper Rx Bacteria Enzymes Usage

The Eagle Pass Independent School District has been using this particular enzyme (Sewper Rx Bacteria) in our cafeteria grease traps for the last year and a half. The results have been successful in that it has done its' job in maintaining clear waters, free from odor and very minimum amount of residue or none at all. We have monitored our usage on a bi-monthly method and a few of our schools on a weekly process. This enzyme has worked for us and we continue to use it. We have 18 schools in our district and each cafeteria has either a 500 gal or 1000 gal tank in which we have remained with excellent results. We continue to monitor this process in order to perfect the amount used in each grease trap. Our plan before was to use the sewage truck services three times per year and last year we used it once. Our goal is to eliminate the services of the sewage truck completely.
