To Whom It May Concern:

The City of Eagle Pass Water Works System has been using SEWPER Rx since February 19, 2007 in our Waste Water Treatment Plant and in several manholes and lift stations, which had serious odor problems. This product is being used to eliminate the problem, instead of having to use deodorants to cover the odor.

This process not only cleans the sewer lines, but in the process, the enzymes flow into the Waste Water Treatment Plant helping to reduce the solids, BOD and TSS, as well as maximizing the plants capacity.

This process is reducing our cost in our plant operation by reducing manpower, electricity, and less waste to dispose.

We are very pleased with SEWPER Rx performance. Please do not hesitate to contact me if you have any questions.

Respectfully Submitted,
